PART I

ITEM 1. FINANCIAL STATEMENTS.

The unaudited financial statements for the six month period ended June 30, 1999, are attached hereto.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the Financial Statements and notes thereto included herein.

The Company generated no revenues from its operations during the six month period ended June 30, 1999, and the Company is considered a development stage company.

The Company was primarily engaged in the metals mining business and owned certain mining properties, held under patent, as well as lode and placer mineral rights and its plan of operation generally involved the acquisition of additional mineral claims and the taking to patent of a number of the claims acquired and to be acquired by the Company in the future. However, the Company

did not engage in any material operations during the fiscal year ended December 31, 1998, and elected to cease maintaining its mining properties and reconsidered the business plan of the Company.

The Company is also a General Partner of the Yaak River Resources, Timber Division, L.P., a Colorado limited partnership (the "Timber Partnership") which intends to harvest timber and develop certain mineral resources on claims presently owned or controlled by the Company and on properties presently owned by the United States government to be patented by the Company. During the six months ended June 30, 1999, the Timber Partnership only engaged in administrative activities.

The Company has considered altering its business plan to that of either (i) locating and merging with another company who is seeking to merge with an entity whose securities are presently trading, or (ii) changing the principal business of the Company.

Relevant to (i), a number of potential merger candidates have been presented to management; however, none of these candidates has been acceptable to the Company.

Relevant to (ii), the Company has negotiated a long term commitment to an agricultural development project located in Mongolia with the "Bornuur" Company, a Mongolian corporation, to acquire a 43.8% interest in approximately 24,710 acres of farm land located approximately 65 miles north of Ulaanbaatar,

Mongolia (the "Mongolian Project"). This farm land has been in production for over 100 years. In July 1997 the Mongolian government adopted new legislation privatizing farm land, which management believes presents certain opportunities which the Company may be able to take advantage. The consummation of an agreement with the Bornuur Company is contingent upon the Company securing funding to finance the Mongolian Project. It is estimated that the project will require a cash infusion of approximately \$2.5 million to implement the operating schedule and achieve profitable operations. As of the date of this report, the Company has had negotiations with prospective lenders in this regard, but no definitive commitment has been provided and no assurances can be provided that such an agreement will be reached in the future.

The Company is expected to operate at a loss for the remainder of the fiscal year until either (i) the Company successfully merges with a nonaffiliated entity; or (ii) the Company is successful in funding the Mongolian Project.

The Company expects to continue without any cash revenues for at least the present fiscal year and will satisfy its cash requirements by loans and advances from the Timber Partnership and/or officers and directors of the Company, provided that the Company successfully finances the Mongolian Project or the Company successfully engages in another business opportunity either by merger or acquisition of assets. At present, the Company's financial resources are not sufficient to fund the Mongolian Project. In order to satisfy the Company's capital requirements to fund the Mongolian Project, it will be necessary for the Company to obtain additional financing in the minimum estimated amount of \$2.5 million. Management of the Company is continuing to seek prospective lenders to fund the Mongolian Project. As of the date of this report, management is negotiating with prospective lenders to finance the Mongolian Project. However, in the event the Company is unable to finance the Mongolian Project, management will seek out other viable business opportunities by way of merger or acquisition in order to provide the Company's shareholders with liquidity.

The Company currently has no employees and relies upon the unpaid services of its officers for the operation of the Company. The contracted services of individuals will continue until it is justifiable to employ a full time employee.

#### Forward Looking Statements

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") concerning the Company's operations, economic performance and financial conditions, including, in

particular, the likelihood of the Company's ability to acquire another existing business or assets. These statements are based upon a number of assumptions and estimates which are inherently subject to significant uncertainties and contingencies, many of which are beyond the control of the Company and reflect future business decisions which are subject to change. Some of these assumptions inevitably will not materialize and unanticipated events will occur which will affect the Company's results. Consequently, actual results will vary from the statements contained herein and such variance may be material. Prospective investors should not place undue reliance on this information.

Year 2000 Disclosure

Many existing computer programs use only two digits to identify a year in the date field. These programs were designed and developed without considering the impact of the upcoming change in the century. If not corrected, many computer applications could fail or create erroneous results by or at the Year 2000. As a result, many companies will be required to undertake major projects to address the Year 2000 issue. Because the Company has nominal assets, including no personal property such as computers, it is not anticipated that the Company will incur any negative impact as a result of this potential problem. However, it is possible that this issue may have an impact on the Company after the Company successfully consummates a merger or acquisition. Management intends to address this potential problem with any prospective merger or acquisition candidate. There can be no assurances that new management of the Company will be able to avoid a problem in this regard after a merger or acquisition is so consummated.
